

Sasindu Denuwan

Software Engineer | Full-Stack Engineer | SaaS Systems Engineer

Address: Galle, Sri Lanka

Phone: +94 70 487 9596

Email: sasindudenuwan2006wpsk@gmail.com

LinkedIn: <https://www.linkedin.com/in/sasindu-denuwan>

GitHub: <https://github.com/SasinduDenuwan>

Portfolio: <https://sasindu-main-portfolio.vercel.app>

Professional Summary

Full-Stack Engineer skilled in designing RESTful APIs, managing SQL and NoSQL databases, and developing scalable backend applications using Spring Boot and Node.js. Experienced in building cloud-native and AI-integrated solutions and deploying them through modern DevOps practices, effectively integrating backend systems with web and mobile applications.

Projects

NovaEdu LMS

Technologies: MongoDB, Express.js, React, Node.js (MERN), TypeScript, Tailwind CSS, Redux Toolkit, JWT, OpenRouter AI

- Developed a full-stack MERN learning management system with role-based access control.
- Built secure Node.js and Express APIs with JWT-based authorization.
- Integrated AI-powered student assistance using OpenRouter for contextual learning support.
- Optimized MongoDB schemas using Mongoose for scalable data management.
- Implemented end-to-end course enrollment, checkout, and order tracking.
- Developed an interactive course video player for students.
- Deployed the application on Vercel with proper environment configuration.

EventGo – Online Ticket Booking & Event Management System

Technologies: Java, Spring Boot, Spring Security, JWT, MySQL, JavaScript, Bootstrap, Maven

- Built a full-stack event management platform using Java, Spring Boot, and MySQL.
- Implemented role-based authentication for users, organizers, and administrators using JWT.
- Developed ticket booking functionality with QR code generation and email notifications.
- Created event dashboards, analytics, and financial reporting for organizers and administrators.
- Designed a responsive frontend using HTML, CSS, and Bootstrap.
- Managed data persistence and business logic using Spring Boot services and Hibernate.

Beatify – Music App

Technologies: React Native, Expo, TypeScript, Firebase Auth, Redux, Cloudinary, Tailwind

- Built a feature-rich mobile application using React Native, Expo, and TypeScript.
- Implemented secure authentication and user management with Firebase Authentication.
- Developed music upload, storage, and playback functionality using Cloudinary.
- Designed an interactive UI using NativeWind (Tailwind CSS) with animations.
- Integrated search, playlists, liked songs, and recently played tracking.
- Managed global state and navigation using Context API and Expo Router.

Education

Institute of Software Engineering (IJSE) — 2024–2026

Higher National Diploma in Software Engineering

ESOFT Metro Campus

Diploma in Information Technology

Skills

Programming Languages: Java, JavaScript, TypeScript, Python

Software Engineering: Scalable System Architecture, Problem-Solving, Project Management

Frontend & Mobile: React, React Native, Expo, Redux Toolkit, Tailwind CSS, Bootstrap

Backend: Spring Boot, Node.js, Express.js, RESTful APIs, JWT, SaaS Architecture

Databases & Cloud: MySQL, MongoDB, Firebase, Firestore, Cloudinary, Vercel, Render

Tools: Git, GitHub, Postman, Stripe API, Figma, OpenRouter

Architecture & Methodologies: Layered Architecture, MVC, Agile, Microservices

Achievements

GENESYS Hackathon – 2nd Runner-Up

- Secured 2nd Runner-Up at the GENESYS Hackathon (IJSE) by delivering a functional software solution under strict time constraints.
